Non-GAAP Measures

The tables under "Engility Holdings, Inc. Reconciliation of Non-GAAP Measures" present Adjusted Operating Income, Adjusted Operating Margin, Earnings before Interest, Taxes, Depreciation, and Amortization ("EBITDA"), Adjusted EBITDA, EBITDA Margin, and Adjusted EBITDA Margin, reconciled to their most directly comparable GAAP measure. These financial measures are calculated and presented on the basis of methodologies other than in accordance with U.S. generally accepted accounting principles ("Non-GAAP Measures"). Engility has provided these Non-GAAP Measures to adjust for, among other things, the impact of amortization expenses related to our acquisitions of TASC, Inc. and Dynamics Research Corporation, costs associated with a loss or gain on the disposal or sale of property, plant and equipment, acquisition, restructuring and related expenses, legal and settlement costs, and refinancing-related expenses. These items have been adjusted because they are not considered core to the company's business or otherwise not considered operational or because these charges are non-cash or non-recurring. The company presents these Non-GAAP Measures because management believes that they are meaningful to understanding Engility's performance during the periods presented and the company's ongoing business. Non-GAAP Measures are not prepared in accordance with GAAP and therefore are not necessarily comparable to similarly titled metrics or the financial results of other companies. These Non-GAAP Measures should be considered a supplement to, not a substitute for, or superior to, the corresponding financial measures calculated in accordance with GAAP.

With respect to our "Fiscal Year 2018 Guidance" above, reconciliation of EBITDA guidance to the closest corresponding GAAP measure on a forward-looking basis is not available without unreasonable efforts. We are unable to reconcile EBITDA to net income due to our inability to predict certain non-cash items included in net income, including taxes and timing of potential restructuring charges. The disclosure of such reconciliations may imply to our investors a degree of precision in our calculations that is not possible. For the same reasons, the company is unable to address the probable significance of the unavailable information.
